

USER ACCEPTANCE TESTING (UAT) REPORT

Project Information

Field	Details
Project Name	Mobile Banking Application
Testing Type	User Acceptance Testing
Environment	Staging
Platform	Web & Mobile
Prepared By	Mercy Abednego
Role	QA Engineer

1. Objective

The objective of User Acceptance Testing (UAT) was to validate that the application meets business requirements and user expectations before production deployment.

Testing focused on validating critical customer-facing workflows and business operations.

2. Scope

The following modules were validated:

- Login & Authentication
 - Registration & Onboarding
 - Funds Transfer
 - Goal Savings
 - Fixed Deposit
 - Notifications
 - Administrative Workflows
-

3. UAT Coverage

Feature	Business Validation	Result
Login	User authentication and secure access	Approved
Registration	Successful onboarding journey	Approved
OTP Verification	Identity validation	Approved
Transfer	Successful fund movement	Approved
Goal Savings	Savings lifecycle	Approved
Fixed Deposit	Investment lifecycle	Approved

Notifications	Push & email communication	Approved
Admin Operations	Approval and monitoring	Approved

4. UAT Execution Summary

Metric	Count
Total Modules Tested	7
Approved	7
Rejected	0
Pending	0

5. Business Validation Outcomes

Authentication

Validated secure login and session handling.

Registration & Onboarding

Validated onboarding workflow, OTP verification, and identity validation.

Transfer

Validated successful fund transfer, beneficiary handling, and transaction authorization.
