

SOFTWARE DEFECT REPORT

Project Information

Field	Details
Project Name	Mobile Banking Application
Testing Type	Functional, Regression & UAT
Environment	Staging
Platform	Web & Mobile
Test Cycle	Regression Cycle
Prepared By	Mercy Abednego
Role	QA Engineer

Defect Log

Bug ID	Module	Bug Title	Severity	Priority	Steps to Reproduce	Expected Result	Actual Result	Status
BUG-001	Transfer	Suggested banks display incorrect count	Medium	Medium	Enter valid account number	Top 3 suggested banks displayed	Top 4 banks displayed	Open

BU G-0 02	Savings	Targeted payout displayed during plan creation	Medium	High	Create new savings plan	Only interest rate displayed	Targeted payout shown incorrectly	Closed
BU G-0 03	Notifications	Interest applied email notification not triggered	Low	Medium	Trigger interest application process	Email notification sent	Email not received	Pending
BU G-0 04	Onboarding	Onboarding session not resuming after app interruption	High	High	Exit onboarding midway and relaunch	User resumes onboarding	User restarted onboarding	Closed
BU G-0 05	Transfer	Duplicate transfer triggered on multiple Send Money clicks	Critical	High	Tap Send Money repeatedly	Single transaction processed	Multiple requests initiated	Closed
BU G-0 06	Login	Login button active with incomplete credentials	High	High	Leave one required field empty	Button disabled	Button clickable	Closed

BU G-0 07	Savings	Withdrawal button displayed before maturity	Medium	High	Open immature savings plan	Withdraw button hidden	Withdraw visible	Closed
BU G-0 08	Investment	Incorrect early liquidation payout calculation	Critical	Critical	Terminate before maturity	Penalty applied correctly	Incorrect payout generated	Closed
BU G-0 09	Transfer	Transfer continues despite insufficient balance	Critical	Critical	Attempt transfer exceeding balance	Transfer blocked	Transaction proceeded	Closed
BU G-0 10	Onboarding	Invalid OTP accepted during onboarding	Critical	Critical	Enter invalid OTP	Validation error shown	OTP accepted	Closed
BU G-0 11	Notifications	Auto-save reminder triggered after debit date	Medium	Medium	Wait for reminder schedule	Reminder sent before debit	Reminder delayed	Closed
BU G-0 12	Investment	Duplicate maturity notification received	Low	Low	Wait for maturity trigger	One notification sent	Multiple notifications received	Closed

Defect Severity Classification

Severity	Description
Critical	Major business, financial or security impact
High	Core functionality impacted
Medium	Feature partially impacted
Low	Minor impact or cosmetic issue

Defect Priority Classification

Priority	Description
Critical	Immediate fix required before release
High	Must be resolved before deployment
Medium	Can be scheduled for upcoming sprint
Low	Can be resolved later

Defect Summary

Metric	Count
Total Defects Logged	12
Critical Severity	4
High Severity	2
Medium Severity	4
Low Severity	2
Open	1
Pending	1
Closed	10

Key Findings

- Financial transaction flows required additional validation to prevent duplicate processing and insufficient balance issues.
 - Notification workflows required multiple validations due to delayed or missing trigger events.
 - Session persistence and onboarding recovery required fixes to improve user experience.
 - Early liquidation and payout calculations required strict financial validation due to monetary impact.
-

Recommendation

All **Critical** and **High severity defects** should be resolved before production deployment. Medium and Low severity defects may be prioritized based on business impact and release timelines.

Overall Release Recommendation:

Conditional Go-Live (Pending resolution of Open/Pending defects)
